

MEDICATIONS AND MEDICAL SUPPLIES

SENTINEL [®] FLAVOR TABS	For control of heartworm, whipworms, roundworms, hookworms and fleas. All DryCreek owned dogs take this medication. Similar to Trifexis but less expensive.
Derma- CLO2	Chlorine dioxide antibacterial ointment can be used on all skin infections, small wounds and lacerations to quickly disinfect and heal while preventing scars. This product is expensive but worth it.
Pad Heal	Coats the bottom of your dog's feet to prevent running their pads off while hunting. It can be applied to sore pads as well as used for conditioning webbing and pads to make them more flexible and less prone to injury.
EMT (spray or gel)	A completely natural collagen product that provides the building block matrix for new cell growth. EMT conforms to any wound site. It reduces bleeding and pain as well as soothing and deodorizing the wound. Nancy thinks that this product is totally amazing. It is not inexpensive but it is worth every dollar. The spray is new and easy to apply.
BAG BALM [®]	An antiseptic ointment in a lanolin/petrolatum base. Originally used by dairy farmers on their animals with chapped teats. Effective on humans as well. Good for sore paws and/or superficial abrasions.
TUF-FOOT [®]	A liquid topical for toughening soft, cracked, sore and tender pads. Effective on humans as well.
BETADINE [®]	Antiseptic microbicide. Use as you would on yourself for cuts, scrapes and burns.
NEOSPORIN [®]	Antibiotic ointment. Use as you would on yourself for cuts, scrapes and burns.
VETERICYN EAR RINCE	A one-step formula to clean wounds, kill bacteria and treat infections caused by viruses, fungi, bacteria and pollutants. Use to flush, clean and treat the outer ear and ear canal. Kills bacteria including E.coli, Salmonella, Staph, antibiotic-resistant MRSA, and Strep. In solution, Vetericyn Canine Ear Rinse kills 99.99% of bacteria, single-cell organisms and fungi, making it ideal for prevention and control of infections and maintenance of sanitary conditions. Safe pH neutral, non-toxic formula. Use to keep ears clean and odor free.
VETERICYN OPHTHALMIC GEL	Used to treat irritated eyes. Provides relief from burning, stinging, itching, pollutants and other foreign materials. Vetericyn Ophthalmic

Gel kills bacteria in 30 seconds. The safe pH neutral formula is steroid-free, antibiotic-free, non-toxic and non-irritating. Gel creates an economical medicinal patch. Administer topically to the animal's eye 2-4 times daily. I also use (human) sterile saline solution.

HYDROGEN PEROXIDE

Use as for humans.

ISOPROPYL ALCOHOL

Use as for humans.

BENADRYL[®]

Antihistamine. Consult your veterinarian for usage/dosage. I use after hunting to relieve potential allergic reactions. We purchase the dye free capsules. When necessary we open one full capsule and place the liquid directly into the mouth. Great to have on hand in the event your dog suffers from a bee sting.

STYPTIC POWDER

Use to stop minor bleeding in the event you trim a toenail too close. Gimborn's brand name is "Kwik-Stop".

ADAMS FLEA & TICK MIST[®]

Adams makes several formulations. I only use UPC Code 47417-02274 (Product Number 9503 85-6835-01). Spray on both the dogs and your clothes before going into tick-infested locales.

Malaseb Flush

An antibacterial and antifungal agents for highly effective cleansing of skin irritations and wounds. Use this product prior to applying medication.

Buffered Aspirin

Use to relieve sore muscles or pain in general. Do not give your Vizsla unbuffered (uncoated) aspirin because it is too harsh on his stomach. Vetrynol is a brand made specifically for dogs but you can also purchase coated buffered aspirin in most drug stores. **Never give your dog Tylenol or Motrin.**

Arnica Montana 30

This is a homeopathic treatment that is proven to work (I use it on my girls after they whelp and they recover far more quickly). It is good for healing open sores, internal issues and bruising. You can get this at any Whole Foods and it is inert, which means that it must not be touched by human hands. The container I purchase is built so that you can dispense one dose directly into your dog's mouth.

Rectal Thermometer

This will save trips to the vet. If your dog appears lethargic but does not show any other signs of having an issue, take his temperature. If it is over his normal temp, he is ill. If not, you have more time to observe him.

Pepsid

To reduce stomach issues. The dosage most commonly used is 0.25 to 0.5 mg per pound (0.5 to 1.0 mg/kg) every 12 to 24 hours. A 20-pound dog should get about 5 to 10 mg (total dose) once to twice daily. This is an oral medication, which can be found at most pharmacies. It is often used for 3 to 5 days.

Pepto-Bismol

Some veterinarians recommend Pepto-Bismol or Kaopectate® to decrease diarrhea caused by intestinal infections. The typical daily dose administered to dogs amounts to approximately 2 teaspoons (10 ml total) per 10-pounds, ideally split between two to four doses. This be found at most pharmacies and does not require a prescription. It is often used for 1 to 2 days. DO NOT USE IN CATS.

Vetericyn Wound and Infection

This is an amazing (abiet not inexpensive) product. It heals wounds fast. It cleans, treats and heals wounds and infections without harming healthy tissue. Vetericyn effectively kills antibiotic-resistant strains of bacteria, fungi, viruses and spores. Use it to treat conditions like rain rot, cuts, burns, rashes, eye or ear infections, ringworm, strangles, skin infections and skin fungus. The non-cytotoxic formula of oxychlorine compounds is similar to the animal's own immune system. Vetericyn is safe for use around eyes, mouth and nose. I also use this on my horses and it can be used on humans

Note on Vetericyn:

I love this product line. The company makes many more specialized products than I have listed here. If one of my dogs has an issue that requires a solution not listed here I always check the Vetericyn product line first. Valley Vet Supply (www.valleyvet.com) offers their full line at reasonable rates. If you purchase over a certain amount, shipping is typically free. I purchase most of my dog and horse products from this site.
